

DEVON NAGY

Software Developer & Database Administrator

PROFESSIONAL SUMMARY

Software Developer & Database Administrator with experience designing enterprise applications, modernizing infrastructure, automating business processes, and managing SQL Server environments. Developed full-stack applications, architecting data pipelines, optimizing database performance, and delivering scalable solutions across on-premises and cloud environments.

PROFESSIONAL EXPERIENCE

Nisqually Red Wind Casino | Software Developer & Database Administrator (2022–Present)

- Diagnosed and resolved critical SQL Server replication failures, restoring synchronization without data loss and minimizing downtime.
- Architected and maintained SQL Server infrastructure supporting 30+ databases.
- Consolidated 15+ SQL Servers into a centralized clustered architecture, reducing infrastructure complexity and simplifying administration.
- Designed and implemented a secure SQL Server replication architecture supporting near real-time gaming data synchronization across firewall boundaries while maintaining Washington State gaming compliance requirements.
- Configured and maintained Publisher, Distributor, and Subscriber environments supporting mission-critical operational and reporting systems.
- Proficient with database monitoring tools such as Redgate and SQL Profiler.
- Experience supporting SQL Server Integration Services (SSIS) and SQL Server Reporting Services (SSRS).
- Developed ETL-style SQL Server Agent jobs to centralize data from multiple operational systems into near real-time reporting and analytics platforms.
- Designed and optimized SQL Server stored procedures used by gaming vendors and internal departments to provide real-time visibility into slot machine activity, player engagement, jackpot events, and operational

TECHNICAL SKILLS

Languages

C#, JavaScript, Python, Java, T-SQL, PowerShell, Linux, PHP

Frameworks

React, React Native, Node.js, WPF, .NET 8, Spring Boot

APIs & Integration

REST
REST APIs, Microsoft Graph API, Defender API

Databases

SQL Server, Azure SQL, SQLite, PostgreSQL, MongoDB

Databases Administration

Disaster Recovery Planning, High Availability Systems Design, Database Security and Encryption, Performance Tuning, Query Optimization

Microsoft Platform

SharePoint Online, Power Apps, Power Automate, Power BI

Tools

Dapper, Git/GitHub, Visual Studio, VS Code, SSMS, Azure Data Studio,

metrics.

- Improved query performance by ~30% through execution plan analysis, indexing strategies, join optimization, early filtering techniques, and query refactoring.
- Built automated SQL health monitoring and alerting solutions for database growth, storage utilization, backup validation, and SQL Agent job monitoring.
- Built Power BI dashboards and KPI reporting solutions supporting quarterly, year-over-year, and operational reporting initiatives.
- Developed Employee Directory using React, Node.js, Microsoft Graph API, and SharePoint Online.
- Built Service First Evaluation Platform using React Native, Node.js, SQLite, Power Apps, and SharePoint.
- Developed Hot Seat Drawing Application using C#, WPF, SQL Server, Dapper, and .NET 8. Replaced manual winner selection process with an automated drawing system integrated with live gaming data and SQL Server back-end services.
- Created 50+ Power Automate workflows saving an estimated 5–10+ hours of operational effort daily.
- Led SharePoint Online migration supporting 6+ departments.

VOIP Express | Network Technician (2021–2022)

- Deployed Cisco VoIP solutions for organizations with 10–100 users.
- Configured extensions, call routing, voicemail systems, and user assignments.
- Performed remote troubleshooting and support.

SELECTED PROJECTS

Enterprise Employee Directory

React • Node.js • Microsoft Graph API • SharePoint Online

Service First Evaluation Platform

React Native • Node.js • SQLite • Power Apps • Power Automate

Hot Seat Drawing Application

C# • WPF • SQL Server • Dapper • .NET 8

Microsoft Defender Health Export Automation

PowerShell • Defender API • Microsoft Entra ID

Mando's Disc Golf Tournament Bracket

PHP • JavaScript • MySQL • CRUD • GitHub • SDLC

SQL Profiler, PyCharm, IntelliJ IDEA, WebStorm, Jupyter Notebook, Rubrik, Redgate, Docker, Kubernetes, SSRS, SSIS, SQL Server Agent

Development & Project Methodologies

Agile, Scrum, SDLC, Requirements Gathering, Business Process Automation

EDUCATION

BAS Software Development
Green River College (2025)

AAS Software Development
Bates Technical College (2023)
Dean's List

ADDITIONAL

- Worked full-time while earning both Associate and Bachelor degrees.
- Personal and academic GitHub projects available.
- Professional repositories are proprietary and owned by current employer.
